The Standard Barometer and Thermometers are used at 6 A.M., 10 A.M., 4 P.M. and 8 P.M., and the daily means are obtained by the application of hourly corrections, deduced from twenty years' observations. The column of the Barometer is twenty-one feet above the level of the sea, and the column of the Rain Gauge is two feet from the ground. The wind, rain, and general weather registered are for the present Civil Day—from midnight to midnight.

The total quantity of rain collected since January 1st is 51.00 inches, the average due for the same period being 28.00 inches.

#### STATEMENT OF OBJECTS AND REASONS.

THERE is no provision in the District Municipalities Act under which, when Government undertakes water and drainage works on behalf of Municipal Councils either wholly from Provincial funds or partly from such funds and partly from Municipal funds, officers of the Public Works Department who carry out works as undertakers can enter upon private property in order to lay down pipes and sewers and to do other acts essential to the performance of their duties. The draft Bill accordingly takes power to invest the officers carrying out these works with the powers necessary for the purpose.

Opportunity has also been taken to meet with similar powers persons who may be appointed under section 36 for the execution of any work or of the doing of any act in cases of emergency or under section 37 for the performance of any duty which a Municipal Council or a Chairman has made default in performing. This remedies an obvious defect in the Act.

Continuous complaints have been received from Chairmen of Municipal Councils that the Municipal Act gives insufficient powers to the Chairmen and Councils for the control of the water supplied by special schemes of supply. Opportunity has been taken to invest Chairmen of Municipal Councils in this matter, with powers similar to those exercised in the Victoria City by the President of that Corporation. It is very necessary that in cases where Municipal Councils have spent large sums upon improving the water-supply in their towns, they shall be given increased powers to prevent the wastage of water.
